

Wireless Handheld Microphone for Smartphones (CoMica)

Overview

The Comica CVM-WS50H allows the user to receive a signal from the wireless microphone for up to 200 ft. When the wireless microphone and receiver do not have a perfect line of sight, the unit will have a working distance of up to 100 ft.

The most important component of the Comica CVM-WS50H is the phone holder. This is where you will have access to the main features of the unit. The smartphone holder includes a mute button, a channel set button, an LCD screen for monitoring your audio status, a step-less volume adjustment dial, and an audio output which will be plugged into your smartphone.

The Comica CVM-WS50H comes included with a built-in LCD screen which displays battery information, audio status, channel information, and audio levels. It also comes equipped with a step-less volume adjustment dial which can be adjusted during shooting. It includes a built-in audio jack for monitoring your audio. Monitoring your audio will relieve you of having to deal with being unpleasantly surprised with noise and artifacts in your audio after importing footage into your NLE. It also includes a 1/4"-20 mount for attaching accessories such as on-camera LED lights, tripod, or grip. It's extremely lightweight and is perfect for travel and run-and-gun style shooting.

Specifications

Antenna Type	1/4 wavelength wire antenna
Audio Distortion	<0.5%
Battery Type	Polymer Lithium Battery 3.7V 1150mAh
Channels	6 (0~5)
Frequency Bands	520.000MHz ~ 526.00MHz
Input Audio Format	3.5mm socket
Inputs	Micro USB
Operation Temperature	0 °C ~ 50 °C
Signal-to-Noise Ratio	>65dB
Sound Delay	<20ms
Storage Temperature	-20 °C ~ + 60 °C
Stray Radiation	<-60dBc
Transmission Power	10dBm
UPC Code	6971120980722

Special Features
