

EG03TT

Telescoping Video Tripod Quick Kit w/ GH03 Head (*E-Image*)

ONE SHEET

Overview

The EG03TT combines the versatility of the GH03 fluid head with the lightweight, telescoping 760AT tripod legs. This combo is easy to carry and can be set up anywhere, making it a great light-to-middle-weight kit.

The GH03 Video Tripod Head is an Ikan top-seller. With a recommended payload of 11 lbs. and multiple mounting points for pan handles and accessories it can easily support DSLRs and mirrorless cameras along with most cages, base plates, on-camera lights, and monitors.

The 760AT telescoping tripod legs can support everything the GH03 head can, and then some. Leg locks are easy to operate for quick height adjustments, and the legs can be independently set at different angles to accommodate shooting on even the roughest terrain.

EG03TT | Telescoping Video Tripod Quick Kit w/ GH03 Head (*E-Image*) | UPC Code: 847983019489

Easy Setup On Any Terrain

Each of the 2-stage legs of the 760AT tripod can be independently adjusted for length and position, making it perfect for stabilization on uneven ground. The feet also have retractable spikes for soft ground and rubberized feet for more hospitable locations.

Sturdy & Lightweight

Built of aluminum and utilizing a minimalistic, telescoping, tube-leg design, these legs shave precious pounds off of your total kit weight and bypass the need for spreaders. The 760AT can hold up to 44lbs, has a locked maximum height of 52.5", a minimum height of just 9.5", and a 75mm bowl for mounting a video tripod head.

Great Various Weight Rigs

The GH03 Fluid Video Head has a recommended payload of 11 lbs., comes with a GB1 pan handle and GP1 quick release plate, and fits into a 75mm bowl. Pan drag and counterbalance are both installed and fixed, while tilt drag is adjustable via a dial on the side of the head.

Flexibility in Accessories

You get two rosettes for mounting pan handles, allowing you to mount the included handle on either side of the head, or mount two handles simultaneously for extra control. Last, but not least, there are two ¼"-20 accessory mounting points towards the front on each side of the head for mounting monitor arms or other adapters directly to the head.

Real "Down to Earth" Shots

When used together, the GH03 fluid head and 760AT tripod legs can get your camera just 12.5 inches from the ground to add an extra dimension to dynamic shooting. When fully extended and locked, the kit sits at 55.5 inches tall.

What's Included
