

## 2-Stage Aluminum Tripod with GH15 Head (E-Image)

### Overview

The EG15A2 is a video tripod kit designed for heavy loads and, with the addition of a dolly, makes an excellent pedestal substitute in a pinch. The 100mm bowl system of this kit can handle bulky loads without slipping and can support heavy standard rigs and moderate-to-heavy broadcast camera loads with ease. This kit is also perfect for teleprompters, sliders, jibs, and PTZ rigs. The 100mm tripod kits also come with extra accessories. Altogether, you get a mid-level spreader, ground spreader, padded rubber feet, heavy-duty shoulder bag, extendable pan-handle, and a quick release plate for the head.

### Special Features
