## Detachable Shoulder Mount Rig

ONE SHEET

### Overview

The entire rig is made to be lightweight, and break down into three pieces for easy transport with your camera gear. The shoulder bar inserts into the baseplate, where it is held securely and without wobble, until you activate the release levers by squeezing.

All parts that are meant to be manipulated are red, as opposed to the black color of the rest of the rig, for easy identification. The shoulder pad is reversible, so you can use it as a conventional shoulder support, or flip it so that it provides comfort while you pull the rig into your chest.
