

JIB-01C

Mini Jib Arm - Carbon Fiber

ONE SHEET

Overview

The JIB-01C is a lightweight portable telescoping carbon fiber jib that extends to just over 9 feet (from 60" Tripod base) yet fits into a 38" carry case. Its maximum reach is 50" and minimum reach is 21.5" The Jib-01C offers a range and weight capacity (9lbs) only found in more expensive units.

The jib has multiple mounting options for quick release of camera and fluid head making it a flexible shooting tool. When paired with a 75mm bowl or 3/8" stud tripod the jib pans and tilts smoothly and also has multiple pan and tilt locks for safety and ease of operation.

JIB-01C

Features you need, Prices you want.

Multiple Camera Mounts

The JIB-01C has multiple mounting and operational configurations. Choose the quick-release camera mount and operate from the rear of the jib. Mount a fluid head to the 75 mm bowl adapter (included) and operate from the head of the Jib for better pan-and-tilt control.

Seperate Pan & Tilt Locks

The JIB-01C doesn't require a head to mount to a 75mm bowl tripod. It's easy to balance and has integrated pan-and-tilt safety locks.

Compact & Portable

The compact, lightweight and versatile JIB sets up and breaks down with ease, and packs away conveniently in the small shoulder bag (included) for transport.

Telescoping Balance

Once you balance your jib, you can easily and quickly re-balance it as needed (after lens changes, etc.) by telescoping the weight ballast.

Monitor Mounting Points

Accessories such as monitors, batteries, converters and recorders can be integrated by utilizing the mounting points on both sides of the jib's base (1/4 inch, 20-thread and 3/8 inch, 16-thread available).
