

MA-90

Aluminum Monopod with Feet

ONE SHEET

Overview

The new E-Image MA90 monopod epitomizes video production flexibility. It provides premium camera stabilization especially for on-the-go shooting or within confined situations. The MA90 monopod is designed for use with DSLR cameras & standard camcorders weighing less than 17.6 lbs. Three retractable feet provide a balanced foundation even on rough terrain; a four-tiered aluminum body enables perfect height adjustment for more than 6.5-Feet. To add to this monopod value package is a comfortable, rubberized foam grip and nylon lanyard wrist strap.

The MA90's fluid cartridge base provides smooth panning and tilting comparable to high end video equipment. What's even better is the fluid cartridge can double as a mini tripod! This is highly useful for low-to-the-ground camera work. Best of all, the versatile MA90 is extremely compact. It can collapse down to 28.75-Inches, making it ideal for travelers and videographers on-the-go!

MA-90 | Aluminum Monopod with Bigger Feet | **UPC Code:** 847983016426

MA-90

6+ Foot Extension

With more than a 6-foot extension, there's plenty of vertical room to position your camera above the crowd.

Solid Ground

The MA90's three retractable feet ensure a stable foundation regardless of the terrain.

Removable Fluid Cartridge Base

The functional MA90 can double as a mini tripod simply by removing the fluid cartridge base from the body. This is the perfect setup for confined situations.

Extremely Compact

Versatility is what sets the MA90 apart from the competition! The entire unit can collapse down to less than 30-Inches for easy, lightweight travel.
