

ikan Metal Rack Units

From dedicated rack-mount units to rack-frames for your existing stand alone LCD monitors, ikan has you covered. Our RM4-25, RM3-43, and RM2-65 all feature a full metal enclosure, front mounted controls, a single captive power input, a dry-erase label space, front handles, and every unit tilts for just the right viewing angle. For versatility, purchase two of our 7 or 8 inch monitors with the corresponding metal rack frame and you have separates or rack-mounts at your disposal, all with the same two monitors. Applications include news/production trucks, permanent multi-camera studios, field productions, control rooms, and security installations.

...For the ultimate in rack-mounting portability try a pair of our new Uni-Rack rack mounting ears, available in 2U and 5U sizes.

Key Features: Rack Units and Rack Frames:

- Dedicated rack units are fully metal enclosed.
- All controls accessible from the front.
- Full BNC loop-through for each monitor (Dedicated Units).
- Locking power connection (Dedicated Units).
- All Rack Mounts have adjustable viewing angle.
- Rack Mount frames available for most ikan single monitors.
