

PD1

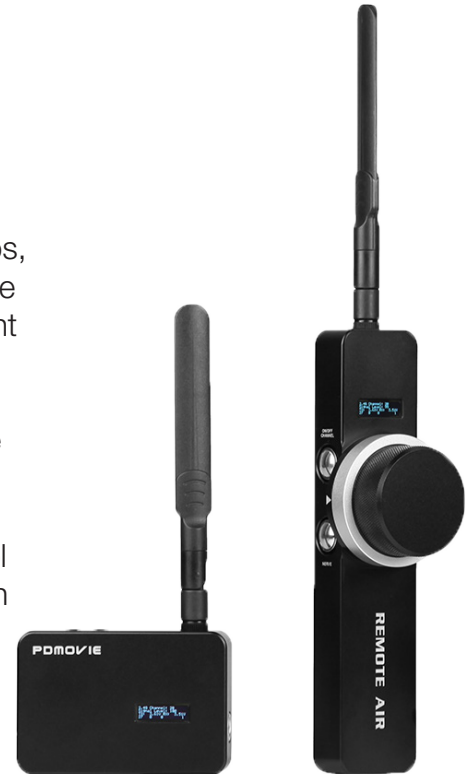

PD Movie Remote Air One

ONE SHEET

Overview

The PD1 is an adaptable camera control solution offering lens Focus and Zoom/Iris control for precise, reliable, and consistent performance. With today's new demands in film and video production, the need for a reliable wireless follow focus system is greater than ever. As complex shots on jibs, dollies, gimbals and steadicams creates zoom and focusing challenges the Remote Air System offers professional solutions that adapt to your different shooting styles and needs.

The PD Movie Remote Air One wireless follow focus system is a complete solution that brings reliable performance to the most involved shooting situations. Designed for standard style lenses, this single channel system allows you to precisely control focus and/or the iris/ zoom. Use the control wheel to focus from slow to quick rack moves or to ramp your zooms with no delay in latency. The durable aluminum uni-body hand unit features an OLED display with channel and connection strength read outs. With 20 channels to choose from, the unit maintains peak performance without interference up to 300 feet away.

PD1 | PD Movie Remote Air One | **UPC Code:** 847983010943

Special Features

- Single channel programming
- 1 standard drive motor
- Aluminum unibody design
- Remote with OLED display
- 2.4GHz digital wireless range up to 300 feet with 20 channels
- Left/right handed operation
- Automatic lens calibration

Recommended For

- Studio Camera
- Pan Handle Lens Control

Durable All Metal Construction

PD Movie Remote Air is made of durable all-metal construction. It has been designed and crafted to be a professional grade production tool.

30 Hour Battery Life

The wireless hand controller has a 30-Hour battery life for worry free continuous use without the need for frequent recharging. For continuous use, plug the hand unit into a portable USB charger and keep on shooting.

All Cables and Controllers Included

Compared to similar units, the PD Movie Remote Air comes out of the box with everything you need: 1 Hand Controller Unit (Transmitter) 1 Motor Control Unit (Receiver) Standard Torque, or High Torque Drive Motors, and cabling. Simply plug the provided D-tap power cable to a pro battery (not included) or other D-tap power supply options @ 12-20v.

Fits 15mm & 19mm Rods

Two step-down rings are provided for securely mounting the motor and the receiver to the 15mm or 19mm rods.

Range Up to 300ft

Use the remote air confidently up to 300' away. By utilizing the Transmit (TX) and Received (RX) signal strength read-out on the hand control, the operator can move around the set freely while keeping signal throughout the shot. Execute gimbals, jib, or remote camera moves without losing precise camera lens control.

Sets Manual A-B Stop

With the PD Movie Remote Air, the manual set up allows the user to create the same effect as a hard stop just like a traditional follow focus.

Automatic Lens Calibration

A single button push will automatically calibrate the lens to its hard stops. Then you are ready to begin marking your points on one of three provided removable focus marking disks.
