

Professional 17" High Bright Beam Splitter Teleprompter

Overview

Ikan's professional teleprompter series is designed for a quick and easy setup to work efficiently in outside broadcast applications or professional studios. The lightweight aluminum teleprompter has multiple 3/8-16" and 1/4-20" for mounting to a pedestal. The high quality 70/30 made in America teleprompter glass provides the perfect balance of reflection and pass-through without distorting the image. With 1000 nits the prompting image will always be crisp and visible whether you're under the sun or studio lighting. Our professional line teleprompters not only include three different camera mount bases, but also counter weights to allow for a large range of different sized cameras to work. The professional teleprompter is shipped in reusable custom cut foam which will help keep the kit safe and organized when you set it up or break it down. The custom cut foam can also be re-purposed to perfectly fit in the SKB iSeries 3i-2217-12BE Waterproof Hard Case*.

*Hard Case Not Included
