

SB200

Stryder 200 Watt LED Bi-Color Light

ONE SHEET

Overview

The Stryder Bi-Color 200 watt LED light is a part of Ikan's Stryder line of COB LED lights.

The SB-200 is a 5" Fresnel light that can change from a wide beam angle to a tight beam with the click of a latch. The extremely quiet active cooling system keeps it working through any shoot. It's easy to move the Stryder around on set due to its lightweight Nylon-Resin body and easy setup. Its hardy outer shell makes the Stryder resilient from the rigors of any shoot.

With DMX512, this versatile field light can be used in or out of a studio. The gold mount or V-Mount battery allows for use in any environment. The large yellow knob control makes it easy to operate menus and adjust colors. With the 4 way barn doors included, the Stryder SB-200 Bi-Color LED is all you need on set.

SB200

Features you need, Prices you want.

Versatile Field Light

The lightweight body can be used in any shooting environment.

Arcylic 5" Fresnel Lens

The 5" fresnel lens gives you control over the beam spread of light.

Quiet Active Cooling System

The quiet active cooling system keeps the light working even on those long shoots.

60° Beam Angle

The light casts a 60° wide angle beam when the fresnel spot adjuster is removed.

Detachable Fresnel Adjuster

It can cast a 30° beam when the fresnel adjuster is attached to the front of the light.

DMX512

The DMX512 is included on the light for use in the studio or any DMX situation.

Lightweight, Durable Housing

The Stryder's lightweight and strong chassis make it perfect for the mobile shooter.

Pro Battery Operation

It includes pro battery options for any need.

4 Way Barn Doors Included

With the Stryder's barn door included, you're ready to tackle any needs on set.
