

SW50-2PT-KIT

Stryder 50W Daylight Fresnel 2-Point Kit

ONE SHEET

Overview

The Stryder Daylight 5600K 50 Watt LED Light is a part of Ikan's Stryder line of COB LED Lights. The SW50 two point LED Light kit has a 4" fresnel light that can change from a wide beam angle to a tight beam angle with the click of a latch. The extremely quiet active cooling system keeps it working through any shoot. It's easy to move the Stryder around on set due to its lightweight, tough plastic body and easy setup.

This versatile field light can be used in or out of a studio. The 18650 batteries that power the SW50 are a convenient power source since they can be found in most stores. This allows you to operate and control the brightness. With the 4-Way barn doors included, the Stryder SW50 Daylight LED is all you need on set.

SW50-2PT-KIT

Features you need, Prices you want.

Versatile Field Light

The lightweight body can be used in any shooting environment.

Acrylic 4" Fresnel Lens

The 4" Fresnel lens gives you control over the light's beam spread.

Quiet Active Cooling System

The quiet active cooling system keeps the light working even on those long shoots.

Adjustable Beam Angle

The 60° beam angle fresnel lens can be set to a 30° beam angle by just adding a step ring.

Lightweight, Heavy Duty Housing

The Stryder's lightweight chassis makes it perfect for the mobile shooter.

Adjustable Beam Angle

The 60° beam angle fresnel lens can be set to a 30° beam angle by just adding a step ring.

Lightweight, Heavy Duty Housing

The Stryder's lightweight chassis makes it perfect for the mobile shooter.
