

V17e-FK

The ikan V17e Monitor Field Kit

The Big Picture

For those in need of a large monitor solution for studio and ENG/EFP applications, look no further than ikan's new V17e HD monitor. This 17" high definition monitor features a sparkling resolution of 1366 x 768 to enhance your video production work flow. With BNC component loop through and a single HDMI input, the V17e supports a wide range of HD signals. Additional inputs include standard definition signals by offering BNC composite loop through, S-Video loop through, DVI and VGA inputs.

In The Field

The V17e is enabled for both studio and field configurations utilizing professional AC/DC power solutions. Included in the V17e Field Kit are a basic stand, yoke mount, protective screen, sun hood and the V17e PBK pro battery adapter kit to maximize the V17e as a reliable field monitor.
