System Reset	
Return	

Allows you to adjust the brightness of the LCD backlight.

Turns off / on the touch sensitivity of the function keys.

The DSLR Scaling¹ function will allow users to extend their DSLR camera's HDMI video output any option of 3:2, 16:9 or Full Screen – convenience made simple.

FUNCTION SETUP

Luma Under Warn	
Luma Over Warn	
F1 Key	Peaking
(Same As F2, F3, and F4 Key)	False Color
	Clip Guide
	Underscan
	Check Field
	Pixel
	HV Delay
	Guides
	Crosshair

Only active when false color is enabled.

The VH8 is equipped with Monochrome Peaking features which highlight the desired focus area in a bright, red outline. The operator adjusts the focus control until the red indicator outlines on the desired area are razor sharp, indicating optimal focus. For the best results, be sure the subject is properly exposed.

The False Color feature utilizes a full spectrum of assigned color indicators, ensuring flawless shot exposure. As the camera Iris is adjusted, the subject of the image will change color based on specific brightness values indicating optimal exposure. See included chart for color assignments.

The VH8 offers adjustable upper Clip Guide levels to accurately display overexposed images in any shooting condition. The operator simply assigns the upper IRE to their preference and any exposure over the set IRE limit will flash in a vivid purple, indicating only the over exposed area.

Allows to see the image in monochrome or only the red, blue, or green channels.

The LCD panel in this display has a native display of 1600 x 768 pixels. A signal of any other resolution is scaled to fit this native resolution. There may be time when it is desired to view the incoming signal without scaling. Enabling Pixel to Pixel mode turns off the scaling and displays a 1600 x 768 pixel window of the original image. Each pixel of the panel displays one pixel of the original image. The user may use the scroll wheel on top of the monitor to move the window left, right. Push the scroll wheel again to toggle up and down.

EXIT

User programmable function keys. For quick access, the user may program the F1, F2, F3 and F4 buttons to enable frequently accessed monitor features via the main monitor configuration menu.

Notes:

¹ DSLR Scaling (for HDMI only)
