HD-SDI + HDMI + COMPONENT

VX9

8.9" HD-SDI LCD Monitor

The 8.9 inch VX9 LCD monitor answers the production professional's need for an affordable, effective monitoring solution utilizing the industry-standard HD-SDI input, as well as HDMI, composite and component. The VX9 boasts a panel resolution of 1024 x 600 and features LED backlighting, underscan, overscan, Blue Gun and the continued power option variety you've come to expect from ikan monitors. In addition, the monitor sports a newer, sleeker housing design with improved ventilation and more buttons, putting all necessary features just one click away.
