

iLED-MS

Micro Spot On-Camera Light

ONE SHEET

Overview

The lightweight ergonomically correct micro spot light is great for those quick run and gun shots. The iLED-MS displays a tight beam that is very bright. The light works well for interview as well as b-roll situations. The 4 watt LED has bright even spread that has a solid color temperature across the entire beam. The 5600K Daylight beam can be diffused or changed to 3200K with the simple flip of a gel or diffuser. The dimmer can be set anywhere between 10-100%.

The shoe mount can be used to slide on to the top of the camera or can be mounted to any 1/4-20 arm using the 1/4-20 receiver in the bottom of the shoe. The internal lithium-ion battery is for 90-102 minutes and can be recharged using the 5v mini-USB cable (included).

iLED-MS | Micro Spot On-Camera Light | **UPC Code:** 847983013135

Special Features

iLED-MS

Features you need, Prices you want.

Ergonomic Hand Light

The light is light enough and bright enough to fit in the palm of your hand.

Angle for a Tighter Beam

The 30° beam angle gives the user a much tighter beam of light.

Dimmable Options

The dimmer control can be set from 10-100%.

Internal Battery with USB Charging

The internal lithium-ion battery can be recharged using the 5V mini-USB cable (included).

Mounting Capabilities

The shoe mount allows for easy mounting to the top of the camera.
