

iLED155-DK

Portable L.E.D. Light

The Bare Necessities

Now ikan's popular iLED 155 is available with only the essential accessories needed to deliver the same quality and reliability you have come to expect from ikan L.E.D. lighting. Your iLED 155 light comes complete with a shoe mount, an ikan variable battery plate to support Sony, Panasonic or Canon batteries and an A/C adapter.

The Design

Every now and then you get something right, and ikan's original model, the iLED 100 seemed to be the perfect, small yet powerful, portable light source. From there, we enhanced the design to include a mountable DV battery, better ventilation to prevent overheating and upgraded the brightness of the LEDs. With the iLED 155 from ikan, you'll have light wherever you need it at a price you can afford.

Now also available in basic package:

• iLED155 \$249.00

iLED155 with DV Battery attached.

\$ 349.00
