Features you need, Prices you want.

Kit Includes

iLED 155, Soft Case, AC Adapter, DV Battery, DV Battery Plate, DV Battery Charger, Shoe Mount, and 4 Gel Filters .

iLED 155 Portable L.E.D. Light

Building off of the success of the iLED 150, ikan proudly introduces the iLED 155. The iLED 155 has all the great features of the iLED 150, but we've added the freedom to use additional batteries. Now you can power the iLED 155 with either Sony, Panasonic or Canon batteries using the same variable battery plate system available on our ikan HD monitors. We've also added an additional gel giving you four different gels. With the new iLED 155 from ikan, you'll have light wherever you need it at a price you can afford.
