Notes

For the safety use of products, please read carefully the following instructions regarding the installation, use and maintenance.

- . Please read carefully the product safety and operating instructions before the product is operated.
- . Please keep the safety and operating instructions for future reference.
- . Please pay strict attention to the warnings and implement the products according to the operating instructions closely.
- . All operating instructions should be strictly enforced.
- 1. Please use the power cord recommended by manufacturer.
- 2. Please do not place heavy objects on the power cord.
- 3. Please do not expose this product to rain, humid, dusty places.
- 4. Please do not place vessels with liquid (such as cups, beverage bottles) on the monitor.
- 5. Please do not place this product in high heat places.
- 6. Please make sure the earth terminal is good in order to avoid electric shock.
- 7. Please do not open the back cover to avoid electric shock. Please contact professionals for service need.
- If there is no image or sound, please unplug the power cord from the AC outlet immediately. Please consult professionals if there still have problems after examining carefully.
- 9. Do not place this product at unstable places such as cars, shelves or tables, as it is easy to make the product falling down, may cause severely hurt to children and adults and also damage to the product.
- 10. Please do not touch the power plug with wet hands, as it will cause electric shock.
- 11. Please do not expose the LCD panel in direct sunlight for a long time, it will result in damage or aging of the LCD panel.

- 12. Please display this product at a suitable temperature and humidity place.
- 13. Please do not spray any liquid things and/or add any objects into the monitor, it might cause voltage instability and short-circuit, also can easily cause fires and blackouts.
- 14. If do not use the device for a long time, please unplug the power cord from the AC outlet
- 15. Please keep not less than 5cm space around the vents while using the monitor, in order to obtain good heat dissipation effect.

Security

Screen maintenance:

Please follow the below guidelines carefully to prevent discoloration, stains and scratches on the screen:

- Avoid striking the screen with any object.
- Do not wipe the screen hard.
- Do not wipe the screen with solvents such as alcohol, thinner or gasoline.
- Do not spray detergent or other cleaners on the monitor or LCD panel, as it may cause fault because of water droplets into the monitor.
- Do not write on the screen.
- Do not paste or stick any viscous markers on the screen.

Screen may be cleaned by gently wiping with lint free cloth to remove dust. For the more difficult cleaning, use lint free cloth that has been very lightly dampened with detergent, then dry any excess moisture from the monitor or LCD panel immediately to prevent damage.

Cabinet maintenance:

Please follow the guidelines below to prevent potential damage.

- Do not wipe the cabinet with solvents such as alcohol, thinner or gasoline.
- Do not use any pesticides and/or other volatile substances.
- Do not allow prolonged contact with rubber or plastic.
- Do not wipe the cabinet hard. Use a soft, lint free cloth to clean. If the cabinet cleaning is

more difficult, use lint free cloth that has been very lightly dampened with detergent and then dry it to wipe.

Installation:

- Keep adequate air circulation to prevent device internal overheating. Please do not place the product on the surface of some certain objects (such as blankets, carpets, etc.), as these objects may block the vents.
- Please keep the device away from heat generating sources, such as radiator, heaters and air duct, also keep it away from much dust or mechanical vibration place.

Rack mount Installation:

 For rack mount installation, please keep 1U space from both top and bottom to make sure adequate air circulation, or install an external electric fan. Please follow the instructions and install with the rack mounts provided by manufacturer.

Transportation:

This monitor is precise equipment and need professional packing materials to transport.
 So do not to use packing materials provided by suppliers except KONVISION or its authorized packing material suppliers.

When the following situations occur, please turn off the power, do not insert the plug and contact a professional service staff to deal with timely.

- A. This product smells smoke and off-flavor.
- B. When this product displays abnormal operating conditions, such as there is no picture or sound.
- C. When any liquid is splashed into the product or product dropped.
- D. When the product soaked or fall into the water.
- E. When the product has been damaged or other damage circumstances.
- F. When the power cord or plug is damaged.

The following does not belong to failures:

- If the static image displayed too long, it will have residual image, which should be attributed to the characteristics of LCD display but not a failure. Residual image will disappear automatically after a period of time.
- If this device used in a cold environment, the screen may appear residual image.
 This is not a product failure, when the monitor temperature changes, screen will return to normal conditions.
- LCD screen may appear tiny spots (red, blue or green), this is not a fault, LCD screens are manufactured with high precision technology, and a small number of pixels may not be able to show intermittent.
- 4. Screen and cabinet will become warm gradually during operating.

Features

High resolution LCD panel

 LED backlight and high resolution. High contrast, high-speed response and wide viewing angle technology make the monitor can be used under variety of lighting conditions.

Durable and lightweight design

- Full metal and lightweight design provides cameraman easily and safely to field shooting, and save space for OB vans/studio rooms equipment.

Two Colors Tally Indicator

 Two colors Tally indicator as red and green, to monitor each input signal and check ON-AIR mode.

Auto-detection of all color system (PAL, NTSC, SECAM)

This unit detects the color system automatically.

3D video decoder

Process 3D decoding on VIDEO signals, to realize better reduce cross color.

Motion-Adaptive Interlace to Progressive

- It converts interlaced video to progressive video by motion detection, reduce the

serrated image.

10BIT Signal Processing

 Signal input, signal processing and image output are 10bit data processing, to ensure the details display of the image.

Y/C Input

 Decomposition for the luminance signal (Y) and chrominance signals (C) of the video signal can be input through this connector.

SDI Input

3G/HD/SD-SDI video signal can be input through this connector.

YPbPr Input

- YPbPr video signal (Compatible YCbCr) can be input through this connector.

HDMI/DVI/VGA Input

HDMI signal can be input via HDMI to DVI-I convertor through DVI connector, DVI signal can be input through DVI connector, VGA signal can be input via VGA to DVI-I convertor through DVI connector.

Signal Source Loop through

 Signal that linked to the input connector will be enlarged and linked to output connector. SDI reclock loop out ensure the signal without enervation.

PIP/PBP

 Two SDI inputs signals display simultaneously as PIP (picture in picture) and PBP (picture by picture). One SDI input signal can be also displayed with another signal of VIDEO, S-VIDEO, COMPONENT, HDMI simultaneously, and showing two pictures on the screen.

Audio level meter (UV+PPM)

Show the audio level meter (UV+PPM) for SDI embedded audio.

Waveform

Display input signal waveform and color scope for SDI signal input monitoring. It includes luminance waveform, YCbCr waveform and full screen luminance waveform.
 Luminance waveform will mark with red if over the value specified by user.

Focus Assist

 Focus assist is to aid the cameraman focus on the main body by marking the sharpest edge of the image with red.

False Color

False color can Intuitively observe and calculate illumination level in the image, luminance and illumination values display mapping as luminance level, from darkest to brightest, display blue, cyan, green, yellow, orange and red in turn.

Histogram

 YRGB histogram displays the hue distribution of the entire image under SDI input condition, can intuitively display exposure of the image, display R, G, B 3 channels independently.

Zebra

 Use zebra stripes to mark the parts which luminance is over the reference scope specified by user (default 95%), aid the cameraman to control the illumination, to avoid overexposure.

Vector scope

Vector UV analysis for color bar signal input

Pixel Measure

 User can measure any pixel's specific position and RGB value, also can compare the YRGB value between any 2 pixels.

SWAP Function

In PIP/PBP mode, two pictures can be swapped between each other.

Color Temperature

Different color temperatures can be selected freely.

Image Size Setting

The display mode is switchable among 16:9, 4:3, full screen, 1:1, and the original image proportion.

Marker Setting

Show frame borders, center marker, and safety area, etc.

HV Delay

Display horizontal and vertical blanking area of SDI2 input signal.

Scan mode

Scan mode includes Full Scan, Over Scan, Under Scan.

Part Zoom In

 Zoom in any part of the picture, to watch picture details more clearly, and assist for focus.

Remote Control Function

 Available to connect to the remote terminal to operate the equipment directly, select the input signal, longitudinal mode settings and tally indicator, etc.

Parts and Their Functions

A: Front View

(1)Tally Indicator

It is controlled by the tally function of the RS232 port, with two colors red and green.

(2) Speaker:

Stereo audio output.

(3) Power Button and Indicator

When the external AC power supply with electricity, the indicator light is red. Press this POWER button to power on the monitor, and the indicator light turns blue. Press this button again to turn off the monitor.

(4)SDI1 Button and Indicator

Press this button to select SDI1 signal input, indicator turns blue.

(5) SDI2 Button and Indicator

Press this button to select SDI2 signal input, indicator turns blue.

(6)Video/YC Button and Indicator

Press this button to select input signal between Video and S-video, indicator turns blue.

(7) YPbPr Button and Indicator

Press this button to select component (YCbCr, YPbPr, RGB) signal input.

(8) HDMI/VGA Button and Indicator

Press this button to select signal input among DVI/HDMI/VGA, indicator turns blue.

(9) BLUE/MONO Button

Press this button for shortcut functions: Full color mode, Blue mode, B/W mode.

(10) FLIP Button

Only for SDI1, Press this button for shortcut function: H flip, horizontally flip image.

(11) Zebra Button

Only for SDI 1, Press this button for shortcut function: Zebra

(12) FOCUS Button

Only for SDI1, Press this button for shortcut function: Focus Assist

(13) F.COLOR Button

Only for SDI1, Press this button for shortcut function: False Color

(14) MEASURE Button

Only for SDI1, Press this button for shortcut function: Pixel Measure

Pixel Measure: Press MEASURE button, enter into menu items, rotate VOLUME knob to Scope item, and then rotate IMAGEADJ knob to select Pixel Measure, active the pixel measure function, rotating VOLUME knob (left/right) and/or IMAGEADJ knob(up/down) can move the large cross, to measure any pixel position and RGB value.

This function can be used for comparison of any two pixels: Press MEASURE button to enter into Pixel Measure function. Rotating VOLUME knob (left/right) and/or IMAGE/ADJ knob (up/down) can move the large cross to the first pixel, press VOLUME knob or

IMAGEADJ knob to mark first pixel with a small cross, and then rotate VOLUME knob (left/right) and/or IMAGEADJ knob (up/down), it will appear a large cross, move it to the second pixel you want to compare, it will display difference between the current pixel and the former marked pixel.

Measure	Line 0540	Sample 0 9 6 0	Y 0512	% 050	R256 1 5 8	G256 1 2 6	B256 1 0 3		G% 0 4 9	
			0512	051		126		061		040

Measure: measurement Current: current pixel

Ref-pos: former marked pixel

Diff: difference between the current pixel and former marked pixel

Line: pixel vertical position

Sample: pixel horizontal position

Y: luminance as an absolute value (0-1023)

%: luminance level expressed as percentage (Y value/256) *100% R%: red level expressed as percentage (red value/256) *100%

G%: green level expressed as percentage (green value/256) *100%

B%: green level expressed as percentage (blue value/256) *100%

R256: red level as an absolute value (0-255) G256: green level as an absolute value (0-255)

B256: blue level as an absolute value (0-255)

(15) ASPECT Button

Press this button to select image aspect ratio.

FILL ASPECT: Original ratio of signal source.

16:9: Image display at 16:9 aspect ratio.

4:3: Image display at 4:3 aspect ratio.

1:1: Image display at 1:1 pixel to pixel.

Full screen: Full screen image.

(16) MARKER Button

Press this button for shortcut function: Safety Area

(17) AUDIO/METER Button

Press this button for shortcut function: Audio Level Meter display

(18) HIST Button

Only for SDI 1, Press this button for shortcut function: Y (Luma) Histogram, R G B Histogram. (There is no histogram and RGB histogram when under 480I, 576I signal status)

(19) VECTOR Button

Only for SDI1, Press this button for shortcut function: Vector

(20) W-FORM Button

Only for SDI1, Press this button for shortcut function: Y waveform and CbCr waveform

(21) PIP/PBP Button

Press this button for window layout among single, PIP, PBP mode. In PIP/PBP mode, one of the signal must be SDI2 input, the other can be any of SDI1, HDMI, PC, Video, YPbPr, etc.

(22) SWAP/1:1 Button

At PIP/PBP mode: press this button to swap 2 windows rapidly.

At single mode: press this button to image display at 1:1 pixel to pixel

(23) ZOOM/WIN SEL Button

At single mode: press this button to zoom in

At PIP/PBP mode: press this button to select windows and adjust parameters of selected window.

(24) MENU Button

Press this button to display the OSD menu, and press it again to exit the menu.

Clear the Marker display.

Clear Display mode.

Turn off the shortcut menu.

(25) VOLUME (LEFT/RIGHT) Knob

When in OSD main menu, press this button to select different main menu items, when in sub-menu, press this button to adjust the parameter of the selected item. When not in OSD menu, press this button for shortcut functions: volume, HD volume.

Volume: turn the knob to adjust speaker volume.

HD Volume: turn the knob to adjust headphone volume.

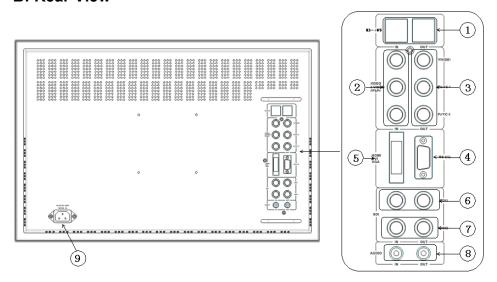

(26) IMAGEADJ (UP/DOWN) Knob

When in OSD main menu, press this button to select different sub-menus . When not in OSD menu, press this button for shortcut functions: Brightness, Contrast, Chroma

In shortcut functions: Turn the knob to adjust the value of Brightness, Contrast and Chroma respectively.

B: Rear View

(1) RS-485(IN/OUT)

For remote control, RS-485 out can be looped out for multi-device control.

- (2) COMPONENT/VIDEO/YC-IN: Analog video (composite), component (YCbCr,YPbPr, RGB) and S-Video(Y/C) signals input
- (3) COMPONENT/VIDEO/YC-OUT: Analog video (composite), component (YCbCr,YPbPr, RGB) and S-Video(Y/C) signals loopthrough output
- (4) RS-232: For remote control /GPI,, Tally indicator control and Marker On/Off, etc.
- **(5) DVI/HDMI/VGA:** DVI input, support DVI signal, HDMI signal (via HDMI-DVI convertor), and VGA signal (via VGA-DVI convertor)
- **(6) SDI2 IN/OUT:** SDI2 inputs (3G/HD/SD-SDI auto detect), SDI Reclock loop through output, without enervation.
- (7) SDI1 IN/OUT: SDI1 inputs (3G/HD/SD-SDI auto detect), SDI Reclock loop through output, without enervation.
- (8) AUDIO (IN/OUT): Analogue audio in and out
- (9) AC IN: 100-240V AC power supply

2 Menu Operation

 Press the POWER button to switch on the monitor; Press the Menu button, the main menu will be displayed on the screen, and press the MENU button again to exit the menu.

- 2. In the main menu, turn the VOLUME knob to select different items: Picture, Img.Adj, Setup, PIP/PBP, (Scope) and Status.
- 3. Turn the IMAGEADJ knob, to enter or exit sub-menu. If sub-menu items are marked by the drop-down sub-menu group with icon, turn it to open or close the drop-down sub-menu group.
- 4. In sub-menu, turn the VOLUME knob to select the sub-menu item operation.
- 5. When the menu window is not enough to show all the sub menu items, it will show up/down arrow $\triangle \nabla$ for the rest items.

Factory Reset

This function is to reset the monitor to factory preset.

Please try to reset the monitor, when the following situations occur:

- 1. The monitor parameters are adjusted incorrect by user.
- 2. The monitor picture or sound is abnormal, and not due to hardware problem.

To do factory reset, please follow the below five steps:

- 1. Press MENU button to enter main menu.
- 2. Turn VOLUME knob to item Setup and select it.
- 3. Turn IMAGE ADJ knob to Factory Reset and select it.
- 4. The screen will refresh after following the instruction of turning the VOLUME knob.
- 5. Power off the monitor, and must wait for at least 5 seconds, then restart the monitor.

The monitor resets to factory preset.

Remote Control

1. Hardware connection

Connect the monitor's RS-232 serial port to the computer to remote control the monitor by universal serial communication software.

2. Software Configuration

Start communication software, configure the serial communication parameters, sending communications test command, if the return value is correct, you can send control command.

Serial port settings:

Baud Rate: 19200

. Parity: None

. . Data bits: 8

Stop bit: 1

. Flow Control: None
