

X-CAGE

The ikan X-Cage

If you shoot skateboarding, snowboarding or BMX riding, your projects take you to the extreme. Shooting under these conditions is more demanding than the average production.

Enter the ikan X-Cage:

The camera support system specifically designed for extreme shooting. ikan created the X-Cage to be tough and offer the best protection to keep your camera safe from concrete, wood, metal or whatever else might fly into it! It's lightweight and allows you to make fast movements that are smooth and stable. The X-Cage's size and weight ensure you can squeeze into tight places, and that you won't distract your subject. The X-Cage is not just a camera mount, it's a fully functional production rig. Industry standard connections (1/4-20 and 3/8) are strategically placed around the frame, allowing you to mount your lights, monitor, audio gear or power supplies easily.

The X-Cage is completely customizable to work for you.

\$ 499.00
