

HomeStream Video Conference Teleprompter with 7" Monitor

Special Features

- 7" monitor w/ mirror image flip
- Allows for eye contact on video calls
- HomeStream remote for iOS and Android only
- Utilizes 70/30 beamsplitter teleprompter glass
- Works with DSLR, mirrorless, camcorders or smartphones as camera
- Attaches to most lens sizes: 49, 52, 55, 58, 67, 72, 77, 82mm
- Option to mount smartphone to record in horizontal or vertical mode
- Three 1/4"-20" threads on bottom of teleprompter

Overview

Ikan's HS-PT700 allows for two display options, using the included 7" monitor or using your smartphone. With the 7" monitor you can easily connect it to your computer via the monitor's mini-HDMI port. The 7" monitor has native horizontal and vertical mirror image flip. Once the monitor is connected to your computer, it will behave like any standard external monitor. This will allow you to display any content (e.g. PowerPoint presentation, video conference session, etc.) on the 7" monitor for you to view through the teleprompter glass while simultaneously allowing you to directly look into the lens of your camera. The monitor is powered via USB through your computer or plugged into an outlet using the included AC adapter.

Download the HomeStream Teleprompter app on either iOS or Android, so you can use your smartphone as a teleprompter display. The teleprompter offers 70/30 beamsplitter glass that clearly displays your text, while at the same time conveniently attaches to the lens of your camera.

Maintain Eye Contact

The HS-PT700 is the ideal size to set up on your desk at home or the office for video conference calls. This allows you to make direct eye contact while you read off your notes or presentation.

What's Included

- | | |
