## Lyra 1 x 3 Bi-Color Studio Light with DMX Control

ONE SHEET

### Overview

Ikan introduces the Lyra Studio DMX brand of soft lights. The High CRI chip LEDs paired with a soft panel give you a very soft wrapping light. Its Bi-color adjustability from 3200K-5600K is great for any light setup. Also, the brightness of the light is consistent across all color temperatures. The beam angle of the light is a wide 110° making it possible to light a large area with a single fixture. The best thing about a Lyra soft light is the nice clean shadow you get from the light itself. The heavy duty yoke and baby 5/8"/junior 1 1/8" combo pin allows you to attach to any stand or use in any studio configurations. The quick set disk locking system allows the professional to lock the light in place when aiming the fixture. The large yellow knob on the back allows you to control the light with a few simple clicks. You can control the brightness, color temperature, and the DMX channel making adjustments as needed. The LED readout gives you the ability to have very precise measurements.

LBX30 | Lyra 1 x 3 Bi-Color Studio Light with DMX Control | UPC Code: 847983021949

# LBX30

Features you need, Prices you want.

## High CRI Chip LEDs

The high CRI Chip LEDs give you a strong output allowing for very bright diffused light.

## Bi-Color Adjustable

The LBX30 has a bi-color adjustable range from 3200K-5600K.

## Consistent Light

The Lyra light gives you a very consistent bright light with all color temperatures.

## 110° Beam Angle

A wide beam angle gives you plenty of soft light.

## Clean Single Shadow

The single shadows give you a more natural shot.

## Combo Pin

With a Baby 5/8" and Junior 1-1/8" Combo pin allows for the use of any grip stand.

## Quick Set Disk Locking

The quick set disk locking system allows you to position the light when up on the grid.

## Single Knob Control

Users can easily adjust the brightness, color, or DMX on the fly by using the single control knob on the lights.

## New LED Readout Screen

The new, bright LED readout gives you a quick reference of the light's output.
