

3-Section Carbon Fiber Tripod Kit Payload 48.5 lbs. (E-Image)

Special Features

- Payload range: 70.5lbs / 32kg
- 1-8 grades of drag for tilt and pan
- Counterbalance adjustment: Continuous Variable Counterbalance
- Tilt range: -67° to +90°
- Bowl Size: 100mm
- Quick-release Plate Sliding Range: 4.7" / 120mm
- Dual-sided pan/tilt arm rosette mounts (two arms included)
- Flip Lock Lever
- 2-Stage/3-Section
- Tripod Height Range: 21.9 - 59.6" / 55.5 - 151cm
- Tripod Transport Length: 29.3" / 74.5cm
- Material: Carbon Fiber Tubes/Metal Body
- Net Weight: 14.8lbs / 6.7kg

Overview

Designed with both broadcast professionals and filmmakers in mind, the MOTUS32 tripod kit is an ideal choice for anybody looking for solid payload support. Included in the kit is the MH32 fluid head, featuring a continuous variable counterbalance that gives operators unparalleled adjustment capabilities on the fly for payloads up to an impressive 70.5lbs. With 1 - 8 grades of independent fluid drag adjustments (and separate locking knobs) for both pan and tilt, allowing the operator to easily adjust the head to suit their shooting style, the MH32 is an incredibly responsive option for professionals that are looking for optimal control and reliability. Longer and wider than its competitors, the MH32's double-locking plate ensures that the camera is securely mounted to the sticks quickly and efficiently, snapping into place from the top of the head. This quick release system is a fantastic perk for larger rigs that struggle to move into place with a rear slider. The ECT100M 3-Section Carbon Fiber Tripod supports payloads of up to 220.5lbs, is made of lightweight carbon fiber, and has a bowl size of 100mm. This 3-Section tripod has designated flip lock levers for each stage, which can be raised to a maximum height of 59.6" and lowered to a minimum height of 21.9". No matter the setting, the ECT100M provides exceptional stability with its extendable mid-level spreader. Quick-release legs allow for even more flexibility to securely adapt to the terrain and then lock the sticks into place, while removable rubber covers for the spiked feet help to protect more delicate work surfaces.

Quick Release Plate / Dual Locking System

When you're in the field, events move fast. The last thing you need is a battle royale between your camera and its mount. Designed to conveniently snap equipment onto the plate system from the top of the head, but then just as easily release the camera with the push of a button, the MH32 is ideal for those with heavy payloads.

What's Included

- | | |
|---------------------------------|---------------------------------|
| 1 x MH32 Fluid Head | 1 x Hard Case |
| 1 x ECT100M Carbon Fiber Tripod | 1 x EI-7000L Mid-Level Spreader |
| 1 x GP4 Quick Release Plate | 1 x Tripod Bag |
| 1 x Bowl Locking Knob | 3 x Rubber Feet |
| 2 x GB4 Pan Handle | |

Payload

Large broadcast camera? Complex cinematography rig? Not a problem. Secured with its 100mm bowl, the MH32 boasts payload capabilities of up to 70.5lbs, providing sturdy support for your next award-winning shot.

Continuous Variable Counterbalance

MH32's step-less system offers continuous variable counterbalance support from the maximum payload all the way down to zero, preventing a camera from tilting forward or backward on its own. From here, MH32 really jumps beyond its competition. A hand-crank and visualized date display allows operators to fine-tune exact counterbalance settings, maintaining that perfect angle for an exceptional shot.

E-MOTUS

Carbon Fiber Leg Tubes/Metal Body

The 3-Section carbon fiber leg tubes are your quintessential tough guys with a soft side. They'll hold up more than 200lbs of camera equipment without busting, but their lightweight carbon fiber material will save your back from the aches and pains often seen after lugging around weightier aluminum tripods.

Removable Rubber Feet

When you're shooting indoors, a tripod's spiked feet aren't the best fit for delicate or slick surfaces. Thankfully, the ECT100M comes with removable rubber feet that will protect the floors (and keep you from sliding around) inside, but then pop right back off when you find your way outside again.

Extendable/Quick Release Mid-Level Spreader

The extendable mid-level spreader on ECT100M offers a great deal of flexibility in a wide variety of situations. Working on rugged terrain? Activate the quick release feature with a small lever to easily remove one - or all - sections of the spreader and bring balance to the tripod. Tight spaces are also easy to navigate, thanks to a locking knob below the spreader that helps keep the tripod legs closed and steady.

Specifications

Bowl Size	100mm
Brand	E-Image
Bubble Level	Illuminated
Build Material	Carbon Fiber Tubes/Metal Body
Counterbalance System	Variable 0-100%
Fixture Weight	33.5 lbs
Head Payload Capacity	70.5 lbs / 32kg
Head Type	Fluid
Height Range	30.7 - 68.9" / 78 - 175cm
Leg Lock Type	Flip
Leg Payload Capacity	220.5 lbs
Leg Stages/Sections	2 stages / 3 sections
Max. Height	5.7'
Measurement Range:	Sliding Range: 4.7"
Min Height	2.5'
Mounting Plate	Manfrotto 501
Mounting System	Quick Release
Pan Drag Settings	1-8
Pan Handle Style	GB4 Telescopic 16.7 - 24"
Quick Release/Wedge Plate	Yes
Rosette	2 Handle Mounting Rosettes
Shipping Weight	54 lbs
Shipping Dimensions	41 x 13 x 12"
Spreader Type	EI-7000L Mid-Level Spreader
Tilt Drag Settings	1-8
Tilt Lock	Yes
Tilt Range	-67° to +90°
