Nano IR ND

Features you need, Prices you want.

Infrared Red Light Control

Built-In Infrared control.

Dual-Sided Nano Coating

Made out of a single piece of optical glass, each filter features NiSi's exclusive Dual-sided Nano coating technology with infrared light pollution control.

Ultra-Low Color Shifting

Superior color control compared to other leading competitors.

NiSi Nano IR GND Transmittance

Laminated Glass Transmittance

Anti-Reflective Coating

NiSi's nano coating reduces glares and reflections to deliver a 6K digital image with no loss in clarity.

NiSi GND R \leq 2.2%

Laminated Glass \leq 5.6%

Oil & Water Resistant

The nano coating creates a protective layer over the glass, making it scratch resistant and easy to clean.

Scratch Resistant

Protective coating reduces sensitivity to scratches.
