## 15＂High Bright Beam Splitter Teleprompter

## Teleprompter Assmebly Setup

## Step 1

Place the teleprompter glass frame on a flat surface and remove the four screws as shown．

Step 2
Align and attach the teleprompter hood with the 8 screw pegs from the teleprompter frame．

## Step 3

The metal frame is directional. Make sure the thicker side is on top and the slimmer side is on the bottom.

## Step 5

Extend the teleprompter hood open and attach teleprompter boot using the clips. It is suggested to align the seam with the bottom of the teleprompter hood.

## Step 6

Remove the monitor mounts from the teleprompter base using the included larger 4 mm hex key to loosen from the 15 mm rods.

## Step 7

Attach the monitor mounts on the back of the monitor's VESA compatible threads using the 4 included screws and provided $2 m m$ hex key.

## Step 8

After the monitor mounts are attached, adjust the 15 mm rods to accommodate the monitor. Leave about 1 inch of room for the teleprompter bracket. Make sure the 15 mm rods go through both set of monitor mounts. Please ensure that all screws are properly tightened after inserting the monitor. *SAFETY NOTE* Make sure to leave at least 2 inches of the rods inside the teleprompter base.

## Step 9

While sliding the teleprompter bracket into the slot of the teleprompter base pull on the red knob to allow the bracket to fully slide in.

## Step 10

Once the bracket is in place, tighten the side screw to lock in place. Double check and make sure all the screws are tightened with the included hex keys.

## Step 11 (optional)

Should the teleprompter be too front heavy, you can attach the included counter weight on the back of the teleprompter base.

## Foam Case

To make your teleprompter more portable, we packed it in a reusable, high-quality foam.
The shape and size of the foam was designed to fit into Ikan's PT-CASE-V2.

## Monitor Ports

BNC - AV Composite Input
VGA - Video Graphics Array DE15 Connection
HDMI - High-Definition Multimedia Interface Input Connection
Power Port - 12-24v Input

HDMI - Switch HDMI input
VGA - Switch to VGA input
AV - Switch to composite BNC input
Flip - Toggle image flip
(Can be set to horizontal, vertical, or both via menu)
Up Arrow - Toggle up to adjust setting
Menu - Access to monitor settings
Down Arrow - Toggle down to adjust setting

## Monitor Menu Settings

## Video Config

Contrast (White Level)
Brightness (Black Level)
Tint (Chroma Hue)
Chroma (Chroma Saturation)
Sharpness (Detail)
RGB Setup - Manually configure RGB
Return
System Config
Menu Duration - Set duration of how long menu stays on screen
