# PT4700-PEDESTAL

## 17" Teleprompter, Pedestal & Dolly Turnkey

#### **OVERVIEW**

Ikan's Turnkey Broadcast Solutions include everything you need for your professional camera setup. This solution includes a 17" teleprompter, pedestal, and dolly. All of our systems have been tested internally for payload compatibility.

The remaining payload capacity, after mounting the full 17" teleprompter without the counterweight, can accommodate camera setups up to 36.5 lbs. The pedestal, without the teleprompter system, can accommodate cameras up to 56.8 lbs. This solution includes a hard case that features custom-cut foam for the entire teleprompter system. This bundle also includes a separate hard case for the pedestal, and a carrying bag for the dolly.

### What's Included

- ☐ 1 x Teleprompter Base
- ☐ 1 x Bracket with Glass
- ☐ 1 x Teleprompter Hood with Boot
- ☐ 1 x Monitor
- ☐ 1 x AC Adapters with Cord
- ☐ 1 x PrompterPro Software
- ☐ 1 x Counterweight Set (2 x 2.5 lbs)
- ☐ 2 x D-Ring ¼-20" Screws
- ☐ 2 x Hex Keys
- ☐ 3 x Height Risers

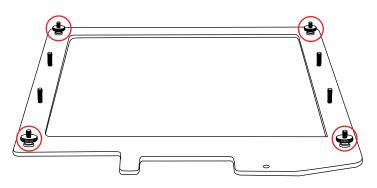

### **Teleprompter Assmebly Setup**

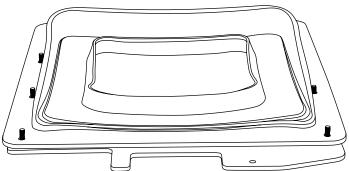

#### Step 1

Place the teleprompter glass frame on a flat surface and remove the four screws as shown.

#### Step 2

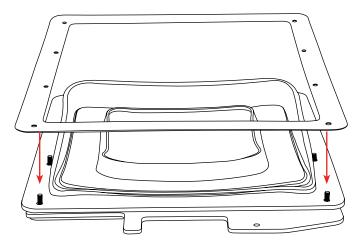

Align and attach the teleprompter hood with the 8 screw pegs from the teleprompter frame.

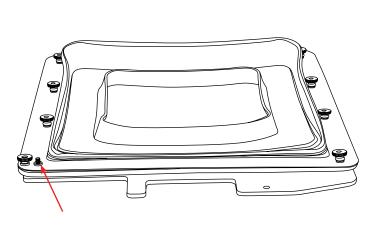

### Step 3

The metal frame is directional. Make sure the thicker side is on top and the slimmer side is on the bottom.

### Step 4

Put the washers on before tightening the screws. The washers and 4 additional screws are inside a bag on the bottom foam.

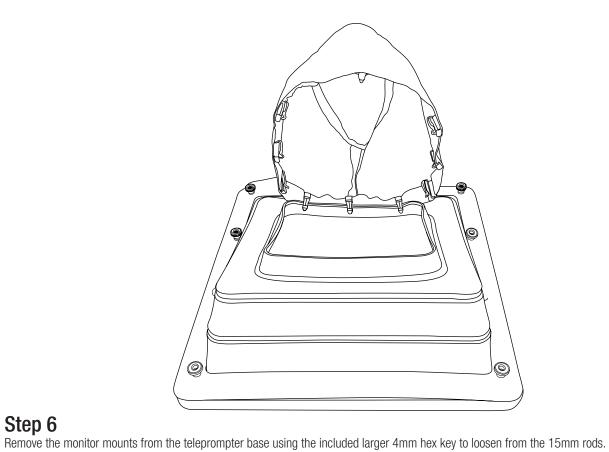

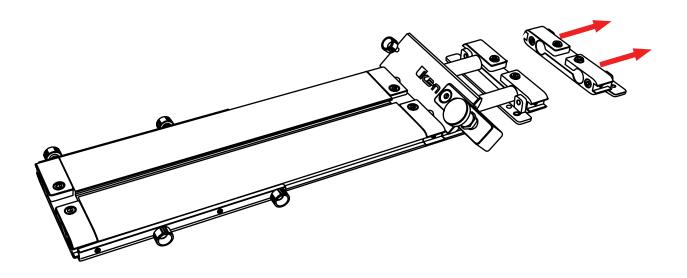

Step 5

Extend the teleprompter hood open and attach teleprompter boot using the clips. It is suggested to align the seam with the bottom of the teleprompter hood.

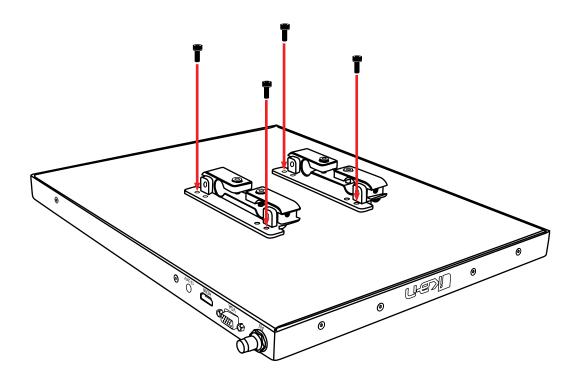

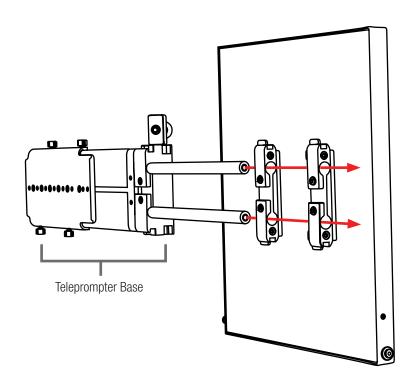

#### Step 7

Attach the monitor mounts on the back of the monitor's VESA compatible threads using the 4 included screws and provided 2mm hex key.

#### Step 8

After the monitor mounts are attached, adjust the 15mm rods to accommodate the monitor. Leave about 1 inch of room for the teleprompter bracket. Make sure the 15mm rods go through both set of monitor mounts. Please ensure that all screws are properly tightened after inserting the monitor. \*SAFETY NOTE\* Make sure to leave at least 2 inches of the rods inside the teleprompter base.

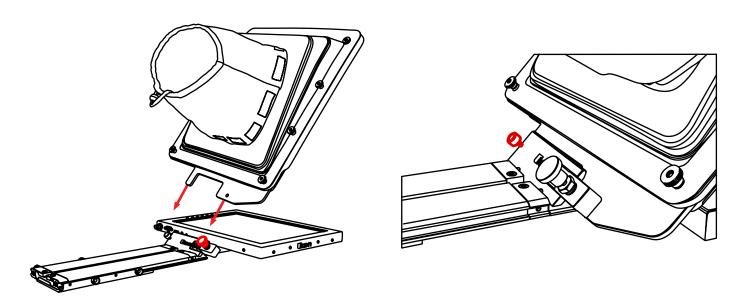

#### Step 9

While sliding the teleprompter bracket into the slot of the teleprompter base pull on the red knob to allow the bracket to fully slide in.

#### Step 10

Once the bracket is in place, tighten the side screw to lock in place. Double check and make sure all the screws are tightened with the included hex keys.

#### Step 11 (optional)

Should the teleprompter be too front heavy, you can attach the included counter weight on the back of the teleprompter base.

#### **Foam Case**

To make your teleprompter more portable, we packed it in a reusable, high-quality foam. The shape and size of the foam was designed to fit into Ikan's PT-CASE-V2.

\*\* DO NOT THROW AWAY FOAM CASE \*\*

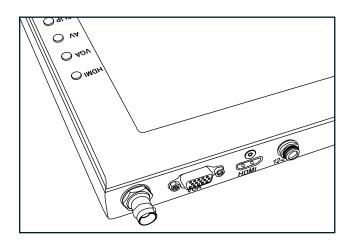

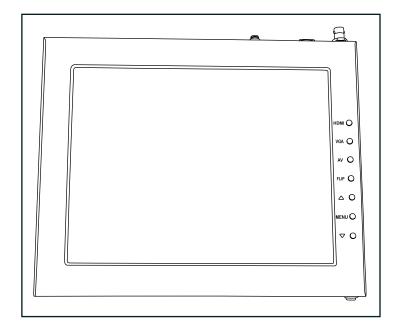

#### **Monitor Ports**

BNC – AV Composite Input VGA – Video Graphics Array DE15 Connection HDMI – High-Definition Multimedia Interface Input Connection Power Port – 12-24v Input

HDMI – Switch HDMI input
VGA – Switch to VGA input
AV – Switch to composite BNC input
Flip – Toggle image flip
(Can be set to horizontal, vertical, or both via menu)
Up Arrow – Toggle up to adjust setting
Menu – Access to monitor settings
Down Arrow – Toggle down to adjust setting

#### **Monitor Menu Settings**

Video Config

Contrast (White Level)

Brightness (Black Level)

Tint (Chroma Hue)

Chroma (Chroma Saturation)

Sharpness (Detail)

RGB Setup - Manually configure RGB

Return

System Config

Menu Duration – Set duration of how long menu stays on screen

Video Ratio – Set screen aspect ratio 16:9 or 4:3 (4:3 is native resolution, 16:9 will create black bars)

Flip-H – Assign toggle button to flip image horizontally

Flip-V – Assign toggle button to flip image vertically

Reset - Factory reset

Return

PC Setup (Only available for VGA)

H-Position – Adjust horizontal position

V-Position – Adjust vertical position

Auto – Monitor automatically adjust position

Return

Exit

### How to set-up FLIP button feature:

- 1. Press MENU button
- 2. Navigate to SYSTEM CONFIG.
- 3. Navigate to FLIP-V or FLIP-H
- 4. Change FLIP-V and/or FLIP-H to "ON"
- 5. Exit MENU
- 6. The FLIP button should now be activated and can be pressed to mirror the image Horizontally or Vertically
- 7. When FLIP-H is ON, the image will flip Horizontally
- 8. When FLIP-V is ON, the image will flip Vertically
- 9. If both are ON, the FLIP button will toggle both Horizontal and Vertical flip
