

V17e

The ikan 17 inch HD Monitor

The Big Picture

For those in need of a large monitor solution for studio and ENG/EFP applications, look no further than ikan's new V17e HD monitor. This 17" high definition monitor features a sparkling resolution of 1366 x 768 to enhance your video production work flow. With BNC component loop through and a single HDMI input, the V17e supports a wide range of HD signals. Additional inputs include standard definition signals by offering BNC composite loop through, S-Video loop through, DVI and VGA inputs.

Here and There

The V17e is enabled for both studio and field configurations utilizing professional AC/DC power solutions. Expanded versatility features for the V17e include basic stand and yoke mount capabilities and offers as options: protective screen, hard case and a sun hood to maximize the V17e as a reliable field monitor. Also featured is a rack mount option and three color tally light display for specific studio configurations making the ikan V17e the perfect, cost effective 17" monitor solution.
