

M19W-NDI-TALENT

19" POE++ Talent Monitor w/ Full NDI Encoding/Decoding & IP Tally Light

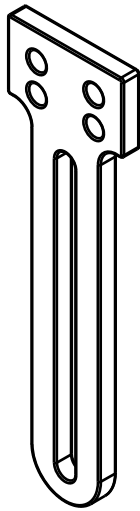

OVERVIEW

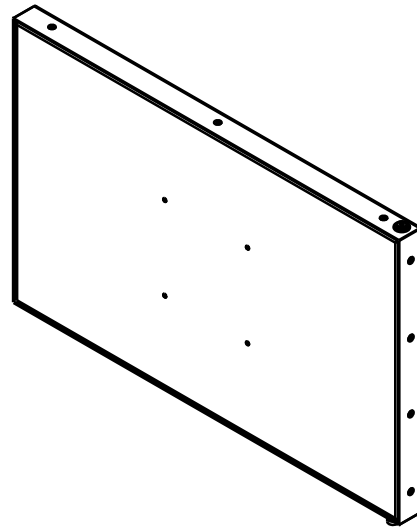

Our NDI Talent Monitor features Full NDI (Network Device Interface) encoding/decoding, as well as traditional 3D-SDI, HDMI, Composite and VGA, inputs. NDI is a video-over-IP protocol that allows for high-quality, low-latency video transmission over standard Ethernet networks. Our NDI teleprompter can be connected to a network using standard Ethernet cables, eliminating the need for dedicated video cables or specialized hardware. In addition, the teleprompter utilizes PoE++ technology that allows both power and NDI data to be transmitted through a single Ethernet cable. By using a single cable for power, tally lights, and data transmission, you can reduce the overall cost of materials, as well as the cost of installation and maintenance.

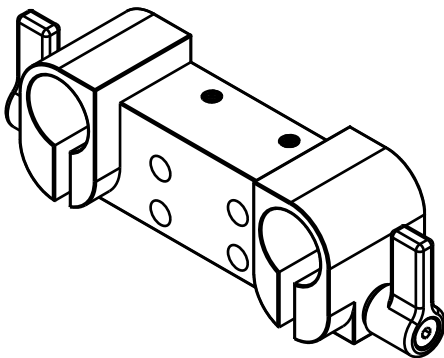

What's Included

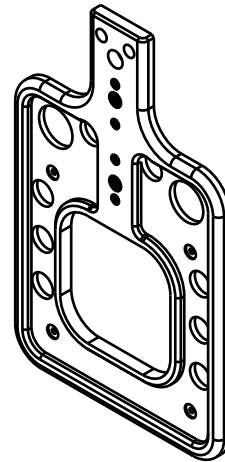

**Height Adjustment
Plate**

Widescreen NDI Talent Monitor

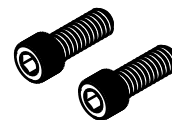

Rod Adapter

VESA Adapter

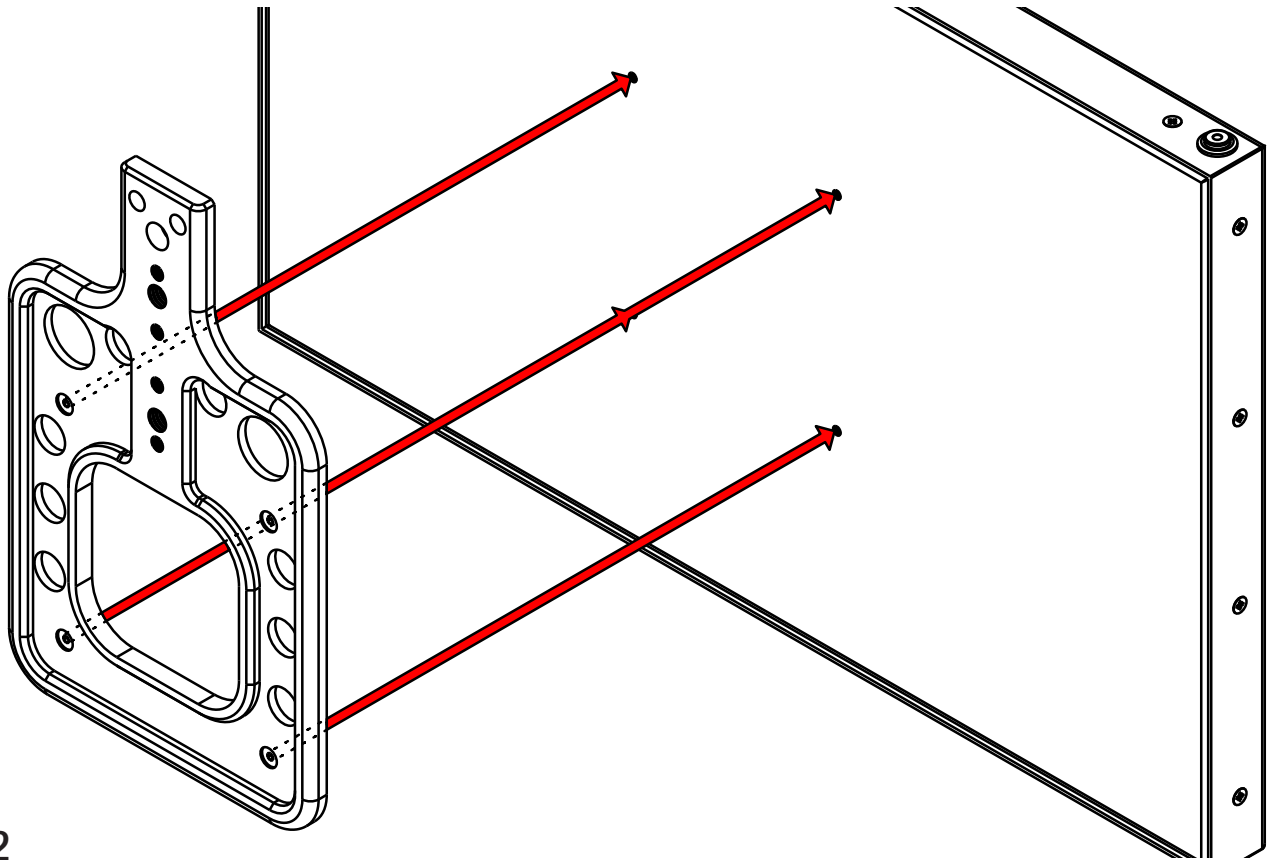

**Thumb
Screws**

Screws

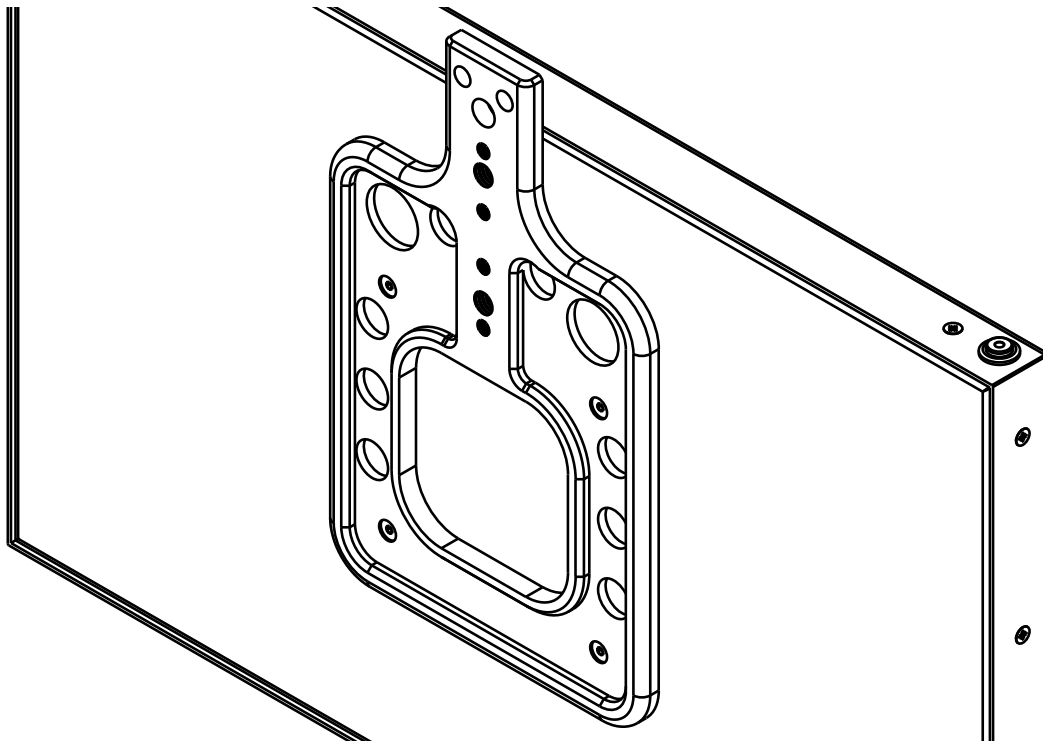

Step 1

Align the holes of the monitor to the VESA Adapter.

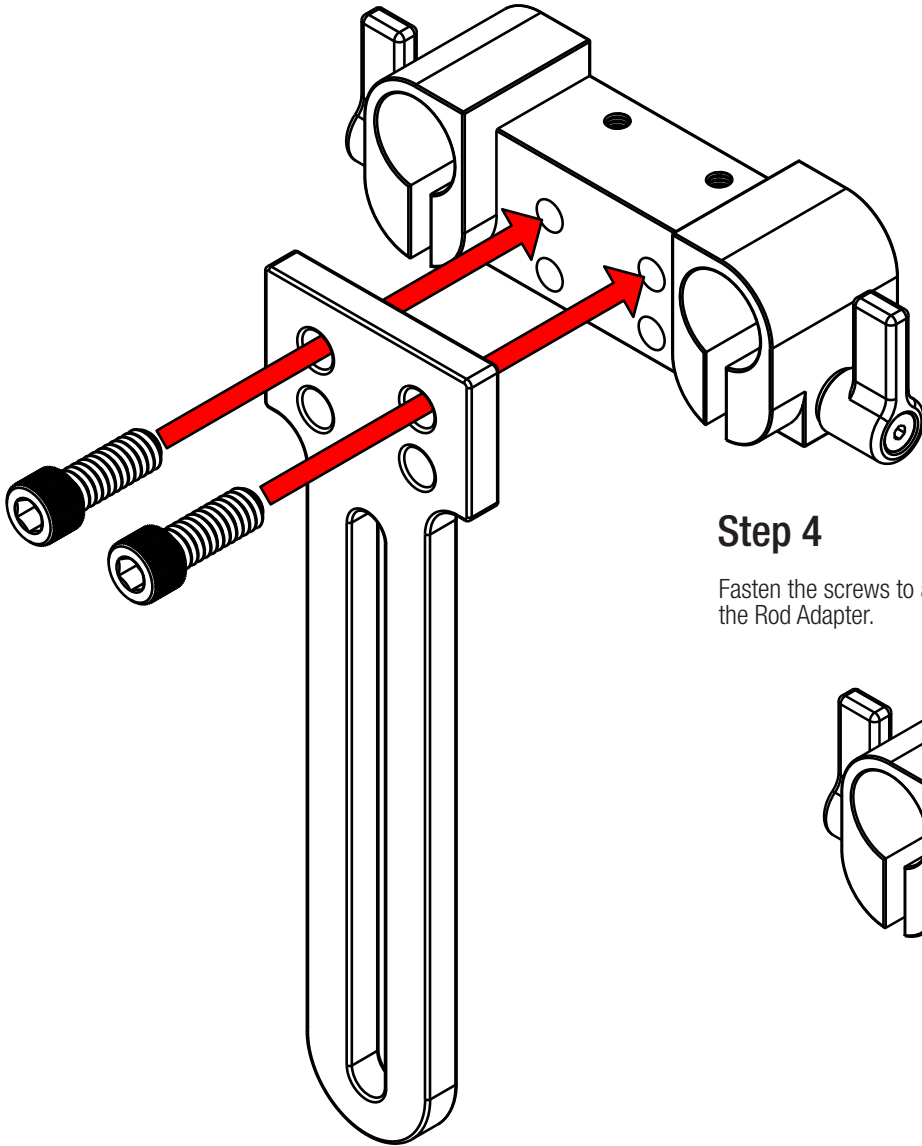

Step 2

Attach the VESA adapter to the monitor by fastening the screws to the monitor

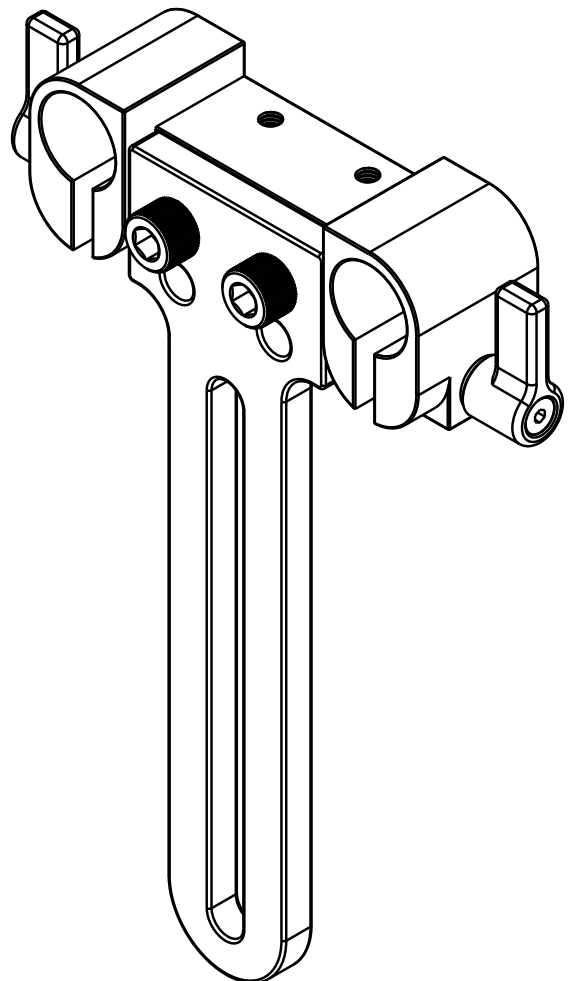

Step 3

Place the Height Adjustment Plate in the Rod Adapter and align the holes.

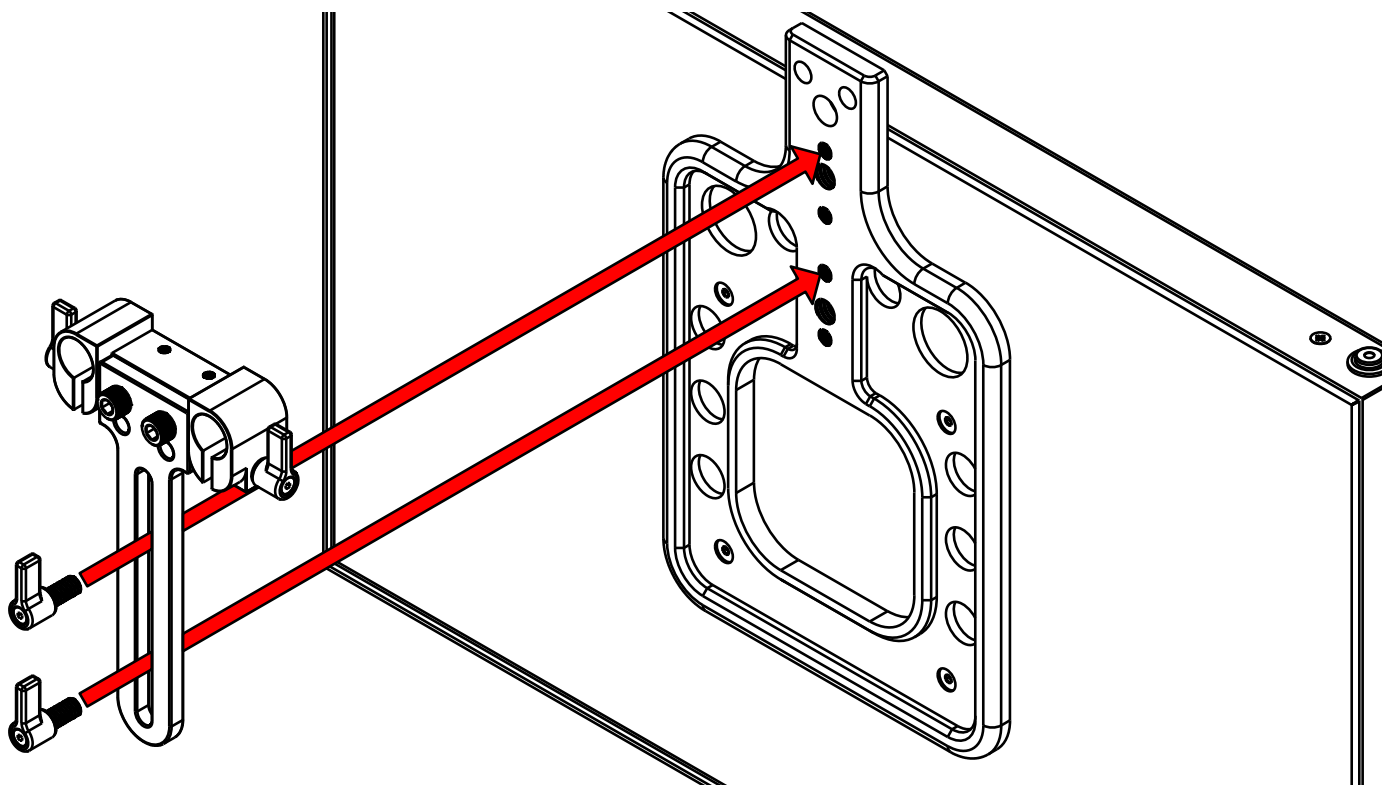

Step 4

Fasten the screws to attach the Height Adjustment Plate and the Rod Adapter.

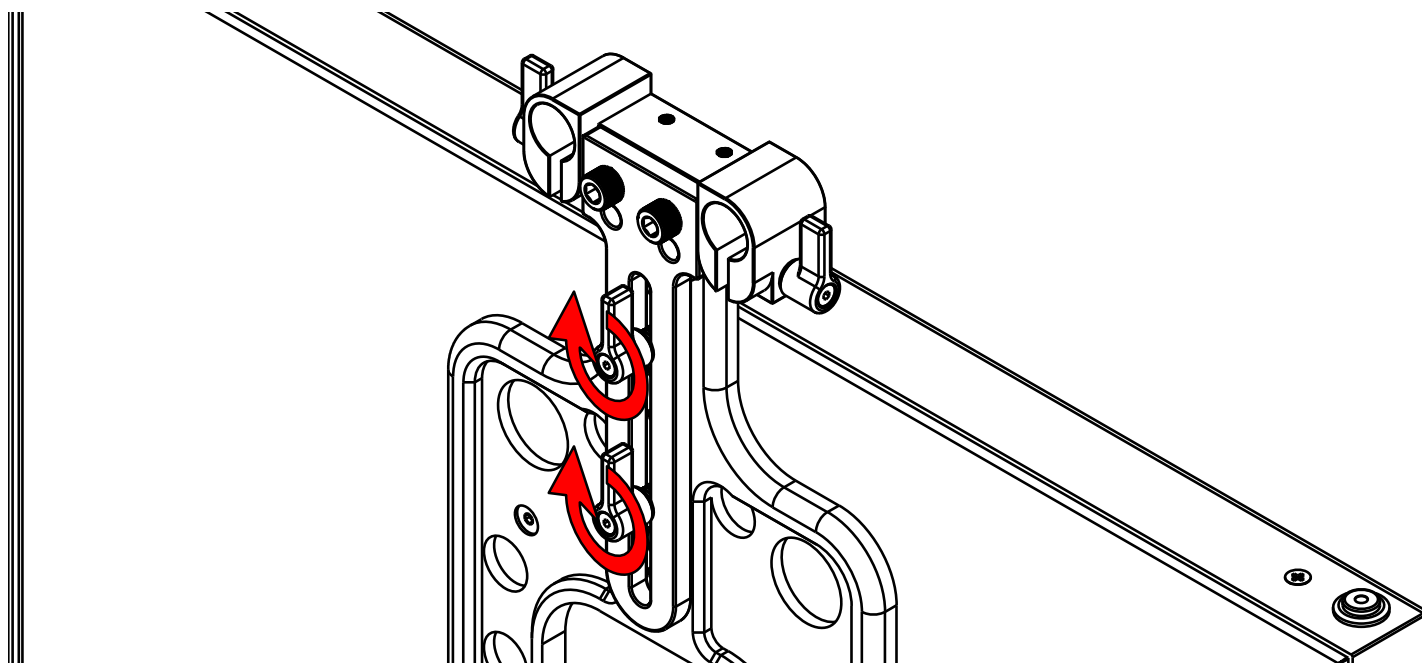

Step 5

Align the threads of the 1/4-20 thumb screw to the threads on the VESA Adapter.

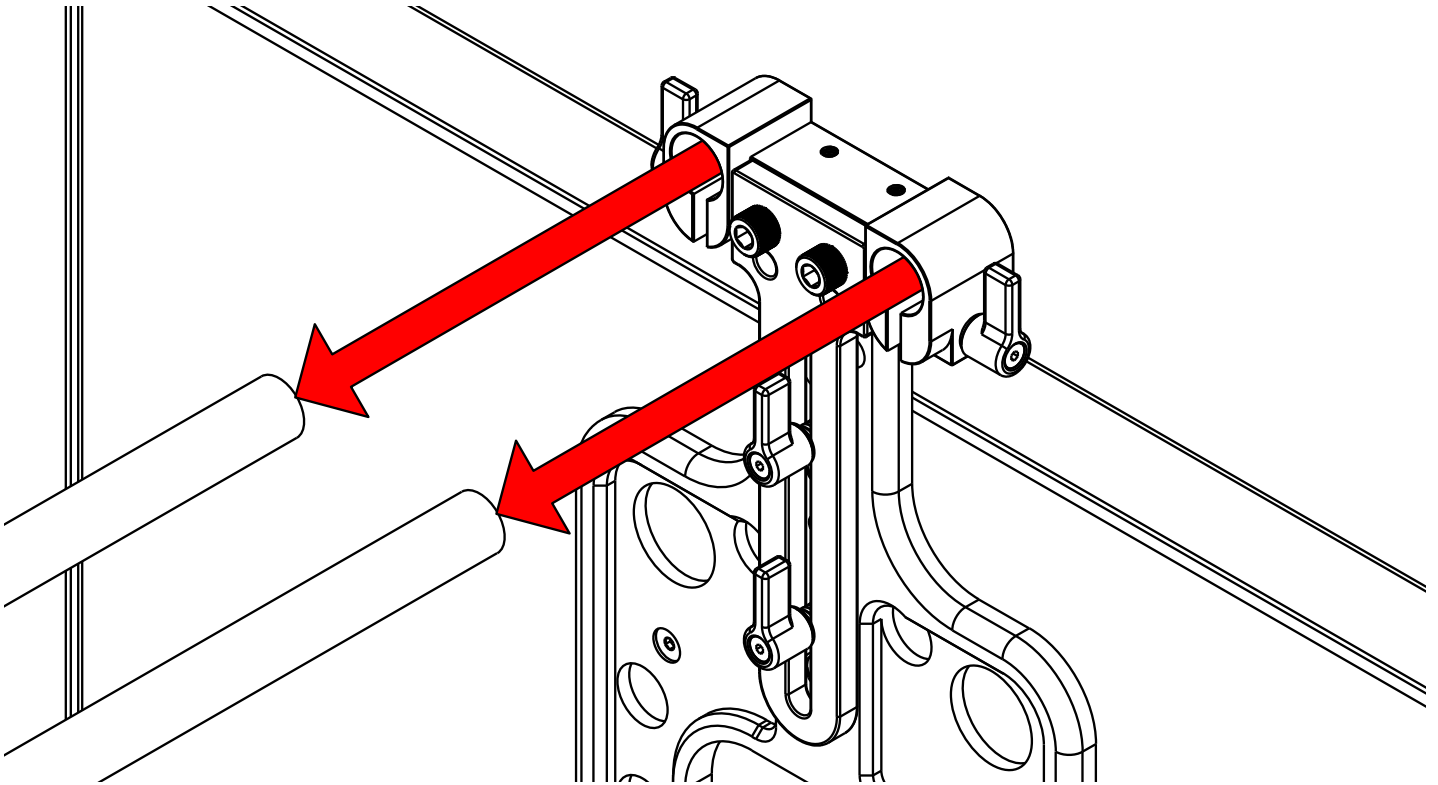

Step 6

Fasten the screws to secure the Talent Monitor to the Rod Adapter.

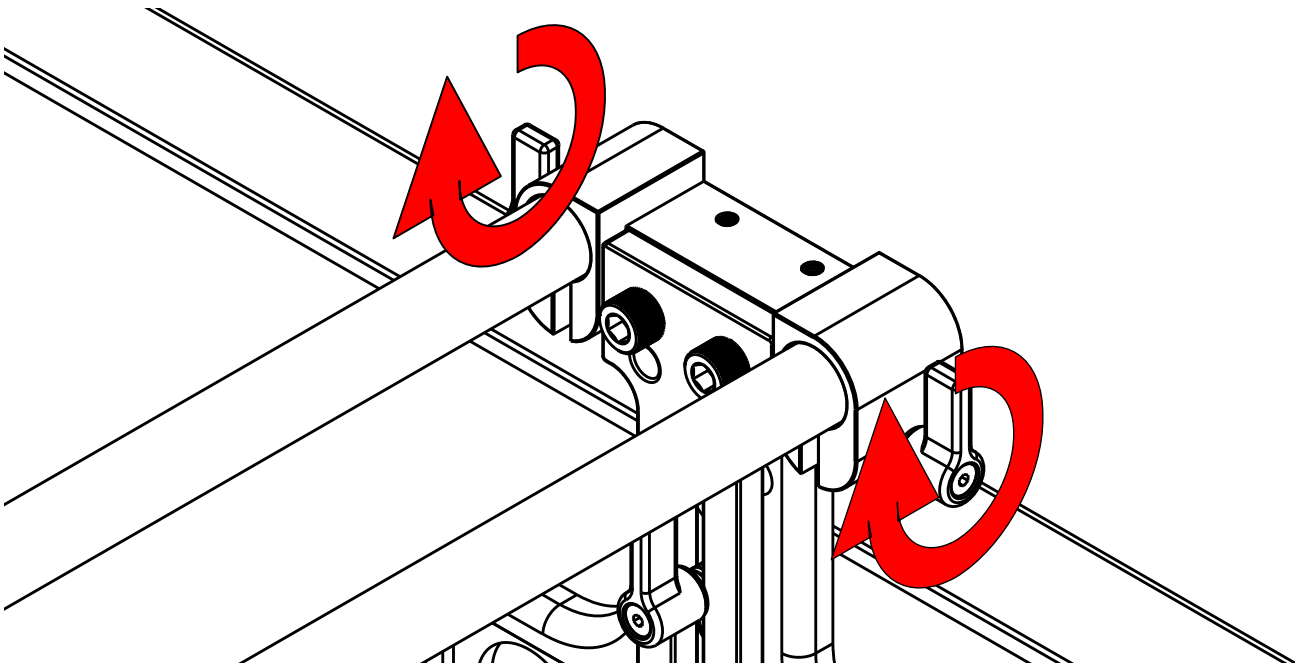

Step 7

Attach the Talent Monitor Mount to the Teleprompter system by inserting the Rod Adapter to the 15mm rods.

Step 8

Once the Talent Monitor Mount has been inserted to the 15mm rods, secure the Talent Monitor by fastening the thumb screws.
